- 1. Wrigley's chewing gum was actually developed as a premium to be given away
- 2. with other products rather than as a primary product for sale. As a teenager,
- 3. William Wrigley Jr. was working for his father in Chicago selling soap that had
- 4. been manufactured in his father's factory. The soap was not very popular with
- 5. merchants because it was priced at five cents, and this selling price did not leave a
- 6. good profit margin for the merchants. Wrigley convinced his father to raise the
- 7. price to ten cents and to give away cheap umbrellas as a premium for the
- 8. merchants. This worked successfully, confirming Wrigley that the use of premiums
- 9. was an effective sales tool.
- 10. Wrigley then established his own company; in his company he was selling soap
- 11. as a wholesaler, giving baking soda away as a premium, and using a cookbook

- 14. soda. He began hunting for a new premium item to give away with sales of
- 15. baking soda; he soon decided on chewing gum. Once again, when Wrigley
- 16. realized that demand for the premium was stronger than the demand for the
- 17. original product, he created the Wm. Wrigley Jr. Company to produce
- 18. and sell chewing gum.
- 19. Wrigley started out with two brands of gum, Vassar and Lotta Gum,

- 1. Some years ago, still at the age of thirty, Tom Cruise had made fifteen films

- 6. built in 1884-1885. Major William Le Baron Jenney, the architect of the first
- 7. skyscraper, created the first load-bearing structural frame, where a steel
- 8. frame supported the entire weight of the walls, instead of load-bearing
- 9. walls carrying the weight of the building.
- 10. After Jenney's accomplishment, as far as buildings are concerned, the sky
- 11. was truly the limit. This 'change in the structural frame has
- 12. changed not only buildings around the world, but how we live as well.
- 1. According to the text, which statement is true?
 - a) There are now many skyscrapers in cities in the world.
 - b) Originally the word skyscraper referred to an architect.
 - c) At first, the definition of a *skyscraper* was applied to the twelve-storey steel-framed building in Chicago.
 - d) The change in the structural frame has had little impact on the world.
- 2. Which word is **NOT** synonymous to **colossal** in line 1?
 - a) immense
 - b) huge
 - c) impressive
 - d) big
- 3. The word **significant** in line 2 means
 - a) impressive
 - b) modern
 - c) important
 - d) wonderful

4. Which of the statements is **NOT** true?

- a) Originally the word "skyscraper" referred to a tall mast or its main sail on a sailing boat.

- d) A tall mast or its main sail on a sailing boat.

Text 12

- 1. Do you enjoy watching wild animals? They may actually enjoy watching you, too!
- 2. If you sit still, like a rock, the birds may fly closer, seeing that you are not a threat.
- 3. Deer may approach you out of curiosity. There are a lot of wild animal "don'ts" but if
- 4. you are observing right, you'll have an enjoyable and safe experience, and so will the
- 5. wild life.
- 6. The first rule is to avoid disturbing the animals. If a bird appears upset by you, you
- 7. are probably too close to its nest and may be affecting the survival of its eggs or young.
- 8. Curiosity may draw you to a bird nest, but beware of the consequences to the
- 9. inhabitants of the nest. Eggs that are left uncovered will cool quickly, killing
- 10. the embryos.
- 11. Second, don't feed the animals. Wild animals who get used to being fed forget how
- 12. to **fend for** themselves. Human food is bad for animals. Most importantly, wild animals
- 13. who lose their fear of humans might bite or attack people if they are teased or denied
- 14. their favorite human treat. A wild animal who attacks a human usually has to be killed.
- 15. My last rule is don't let your dog chase wildlife. This puts great stress on wild
- 16. animals, and they may use too much energy trying to escape. Besides, your dog might
- 17. end up being the victim of a bear or a mountain lion. If you should see an obviously
- 18. injured animal, report it here at the ranger station. Now, I want to wish you all a
- 19. pleasant experience in the Thompson National Forest.

1. What is the text mainly about?

- a) The forest ranger's recommendation on observing the wild life.
- b) The trainer's experience.
- c) The Thompson National Forest.
- d) The wild animals.

2. According to the author, why should one avoid disturbing a bird's nest?

- a) It may cause the death of the babies.
- b) It may result in a fine.
- c) It is forbidden in the national forest.
- d) It is not the best way to draw the birds.

3. Why is it important not to feed wild animals?

- a) It might encourage animals to bite or attack people
- b) Wild animals usually don't like human food.
- c) Feeding wild animals is expensive.
- d) Wild animals would rather find their own food.

4. The phrase **fend for** in line 12 is closest in meaning to

- a) take care of themselves
- b) help others
- c) live without help
- d) protect themselves from the others

5. What might happen if the dog chases wildlife?

- a) The dog might be killed by a wild animal.
- b) The dog will have an enjoyable experience.
- c) The wild animal can always escape.
- d) The dog might become a wild animal.

- 1. The invention of the phonograph happened quite by accident. Thomas Edison
- 2. moved to Menlo park, New Jersey, in 1876, where he established an industrial
- 3. research laboratory. There, Edison was working on a carbon telephone transmitter
- 4. to improve the existing Bell telephone system.
- 5. In that laboratory a year later, Edison invented the phonograph while he was
- 6. trying to improve a telegraph repeater. He attached a telephone diaphragm to the
- 7. needle in the telegraph repeater; in this way, he was able to reproduce a recording
- 8. that could be played back. After he made some improvements to the machine, he
- 9. tested it. He recited "Mary Had a Little Lamb" into the machine and played his voice
- 10. back to a very surprised audience.
- 1. What is the best title for the text?
 - a) An accidental invention.
 - b) Thomas Edison's many inventions.
 - c) Improvements in the telephone and telegraph.
 - d) The history of Menlo Park.
- 2. According to the text, the invention of the phonograph
 - a) was quite unplanned.
 - b) was Edison's principal project.
 - c) was surprising to no one.
 - d) took many years.
- 3. In what year did the invention of the phonograph occur?
 - a) 1877
 - b) 1876
 - c) 1878
 - d) The text does not say.
- 4. According to the text, how was the phonograph made?
 - a) From a combination of telephone and telegraph parts.
 - b) With a telephone needle and a recorder.
 - c) From a recording of a telegraph
 - d) With only a telegraph repeater.

- 5. According to the text, how did Edison test his new invention?
 - a) He read a children's rhyme.
 - b) He made improvements to the machine.
 - c) He used a carbon transmitter.
 - d) He reproduced his voice.

- 1. Many people who are looking to get a pet dog get a puppy. There are many
- 2. reasons why people get puppies. After all, puppies are cute, friendly, and
- 3. playful. But even though puppies make good pets, there are good reasons why
- 4. you should consider getting an adult dog instead.
- 5. When you get a puppy, you have to teach it how to behave. You have to make
- 6. sure that the puppy is housebroken so that it does not go to the bathroom
- 7. inside the house. You have to teach the puppy not to jump up on your guests
- 8. or chew on your shoes. You have to train the puppy to walk on a leash. This is
- 9. a lot of work.
- 10. On the other hand, when you get an adult dog, there is a good chance that it
- 11. will already know how to do all of the previously mentioned things. Many
- 12. adult dogs have already been housebroken. Many adult dogs will not jump on
- 13. or chew things that you do not want them to jump on or chew. Many adult
- 14. dogs will be able to walk on a leash without pulling you to the other side of
- 15. the street.
- 16. Puppies also have a lot of energy and want to play all of the time. This can
- 17. be fun, but you might not want to play as much as your puppy does. Puppies
- 18. will not always sleep through the night or let you relax as you watch
- 19. television.
- 20. On the other hand, most adult dogs will wait on you to play. What is more,
- 21. they will sleep when you are sleeping and are happy to watch television on the
- 22. couch right beside you.
- 23. There is one last reason why you should get an adult dog instead of a
- 24. puppy. When most people go to the pound to get a dog, they get a puppy. This
- 25. means that many adult dogs spend a lot of time in the pound, and some never
- 26. find good homes. So if you are looking to get a dog for a pet, you should think
- 27. about getting an adult dog. They are good pets who need good homes.

- 1. The author apparently thinks that puppies are
 - a) bad pets because they take too much work to own
 - b) friendly, playful, and a lot of work
 - c) not as cute as adult dogs
 - d) not as playful as adult dogs
- 2. As used in paragraph 2, which is the best synonym for **behave**?
 - a) listen
 - b) understand
 - c) train
 - d) act
- 3. The main purpose of paragraph 2 is to explain how puppies
 - a) are very immature
 - b) do not make good pets
 - c) can be very destructive
 - d) are a lot of work
- 4. Based on the information in the text, which of the following statements is false?
 - a) Puppies have a lot of energy.
 - b) Puppies need a lot of attention.
 - c) Adult dogs do not like to play.
 - d) Adult dogs do not need to eat very much.
- 5. Based on the information in the text, it can be understood that someone who owns a puppy must be
 - a) strict
 - b) serious
 - c) careful
 - d) responsible

- 1. Philadelphia is a city known for many things. It is where the Declaration of
- 2. Independence was signed in 1776, and it was also the first capital of the United
- 3. States. But one fact about Philadelphia is not so well-known: it is home to
- 4. nearly 3,000 murals painted on the sides of homes and buildings around the city.
- 5. In fact, it is said that Philadelphia has more murals than any other city in the
- 6. world, with the exception of Rome. How did this come to be? More than 20
- 7. years ago, a New Jersey artist named Jane Golden started a program pairing
- 8. troubled youth with artists to paint murals on a few buildings around the city.
- 9. From this small project, something magical happened. The young people
- 10. involved helped to create magnificent pieces of art, but there were other,
- 11. perhaps more important benefits. The young people learned to collaborate and
- 12. get along with many different kinds of people during the various steps required
- 13. to paint and design a mural. They learned to be responsible, because they
- 14. needed to follow a schedule to make sure the murals were completed. They also
- 15. learned to take pride in their community. It is hard for any resident to see the
- 16. spectacular designs and not feel proud to be a part of Philadelphia.
- 17. Take a walk around some of the poorest neighborhoods in Philadelphia,
- 18. neighborhoods full of broken windows and littered front steps, and you will
- 19. find beautiful works of art on the sides and fronts of buildings. Of course the
- 20. murals are not just in poor neighborhoods, but more **affluent** ones as well.
- 21. Special buses take tourists to different parts of the city to see the various murals,
- 22. which range from huge portraits of historical heroes, to cityscapes, to scenes
- 23. depicting the diverse ethnic groups that call Philadelphia home.
- 24. As a result of its success, the mural program created by Jane Golden has
- 25. now become the nation's largest public art program and a model for other cities
- 26. throughout the country seeking to help troubled youth.

1. The main focus of the text is

- a) an art program designed to help troubled youth
- b) the many tourists who come to Philadelphia to see murals
- c) the reasons why Philadelphia is a unique city
- d) how Jane Golden came up with the idea to start a mural program

- 2. The phrase it is said in line 5 suggests that the author is
 - a) knowingly misleading the reader
 - b) using a quote from someone else
 - c) referring to something that is widely believed, but may be untrue
 - d) referring to something that he or she does not personally believe
- 3. The phrase with the exception of Rome means that
 - a) Rome has fewer murals than Philadelphia
 - b) Philadelphia has fewer murals than Rome
 - c) Rome has the most beautiful murals of all
 - d) Rome and Philadelphia are the only cities with murals
- 4. Which is the best definition of the word **affluent** in line 20?
 - a) popular
 - b) clean
 - c) well-known
 - d) wealthy
- 5. Based on information in the text, the author most likely believes that
 - a) there are too many murals in Philadelphia
 - b) the mural program was an inspirational idea
 - c) all troubled youth should learn how to paint
 - d) every city in the country should adopt the mural program

- 1. Italian adventurer Marco Polo traveled to China near the end of the Middle
- 2. Ages. He came back to Italy in 1295, after his exciting adventures in China. After
- 3. his return, he told the Italians about some really new and different things the Chinese
- 4. were doing.
- 5. Something new that the Chinese were using was money crafted from paper.
- 6. Paper money had been in use in China for hundreds of years when Marco Polo
- 7. returned to Italy from his **voyage** to China and told his countrymen about it.
- 8. Why had the Chinese come to use paper money? One possible explanation is
- 9. related to the supply of metal. Metal is needed to make coins, and the Chinese did
- 10. not have a big supply of metal to make coins for all of the people in China. The
- 11. Chinese had already invented paper, and they had already invented a method of

- 12. printing on paper. When the Chinese needed something to make into money and they
- 13. did not have enough metal, they used paper to make money.
- 14. And how do you think the Chinese government got the Chinese people to accept
- 15. printed paper as money? The Chinese government issued an order saying that the
- 16. paper money it created was to be used by everyone in China. At first, people were
- 17. worried that paper money would not have any value, and they did not want to use the
- 18. paper money. However, the government of China was a very strong government, and
- 19. people had to follow the order to use paper money. After a while, people saw that
- 20. they could use paper money to buy anything, and they began to accept paper money.
- 1. When did Marco Polo return to Italy from his trip to China?
 - a) At the end of the thirteenth century
 - b) At the start of the twelfth century
 - c) At the end of the twelfth century

- 1. If you live in a house or apartment where utilities are not included in the rent, you
- 2. are probably aware of the costs of energy consumption. Consider trying to cut energy
- 3. costs by following these tips.
- 4. During the winter, more energy is used for heating than anything else. Therefore,
- 5. you should set your thermostat no higher than 68 degrees. When no one is home, or
- 6. when everyone is sleeping, **turn** the setting **down** to 60 degrees or lower. On sunny
- 7. days, use the sun's heat by opening draperies and blinds.
- 8. Hot water uses a lot of energy. Run your dishwasher and clothes washer only when
- 9. you have a full load. Use warm or cold water for laundry when you can. Take showers
- 10. instead of tub baths. About half as much hot water is used for a shower. Don't leave
- 11. the hot water running when rinsing dishes or shaving.
- 12. The refrigerator operates 24 hours a day, every day, so it is one of the biggest
- 13. users of energy in your home. Before opening your refrigerator door, pause and think
- 14. of everything you will need so you do not have to go back several times. When you
- 15. do open the door, close it quickly to keep the cool air in.
- 16. Get in the habit of turning off lights when you leave a room, even if you will be
- 17. gone only for a short time. During the day, try to get along with as few lights as
- 18. possible. Let the daylight do the work. White or light-colored walls make a room
- 19. seem brighter. Use light bulbs of lower wattage, and whenever possible, use one large
- 20. bulb rather than several smaller ones.

1. What is the purpose of the text?

- a) To give advice about finding an apartment.
- b) To provide tips for lowering energy costs.
- c) To make suggestions for decorating a room.
- d) To sell thermostats and refrigerators.

2. According to the author, what uses the most energy during the winter?

- a) Heating systems
- b) Light bulbs
- c) Dishwashers
- d) Air conditioners

- 3. Why does the author mention the sun?
 - a) The sun will make the walls appear lighter.
 - b) Using the sun's energy can lower the costs.
 - c) The sun will fade draperies and blinds.
 - d) During the winter the sun doesn't shine.
- 4. The word **turn down** in line 6 is closest in meaning to
 - a) turn off
 - b) reduce
 - c) move
 - d) refuse
- 5. What does the author recommend about the light bulbs?
 - a) Use a large bulb instead of many small ones.
 - b) Buy enough light bulbs for a whole year.
 - c) Replace light bulbs every month.
 - d) Turn on the lights when you leave a room.

- 1. We believe the Earth is about 4.6 billion years old. At present we are forced
- 2. to look at other bodies in the solar system for hints as to what the early history
- 3. of the Earth was like. Studies of our moon, Mercury, Mars, and the large
- 4. satellites of Jupiter and Saturn have provided ample evidence that all these large
- 5. celestial bodies were bombarded by smaller objects in a wide variety of sizes
- 6. shortly after the larger bodies had formed. This same **bombardment** must have
- 7. affected Earth as well. The lunar record indicates that the rate of impacts
- 8. decreased to its present low level about 4 billion years ago. On Earth,
- 9. subsequent erosion and crustal motions have obliterated the craters that must
- 10. have formed during this epoch.
- 11. Scientists estimate the Earth's age by measuring the ratios of various
- 12. radioactive elements in rocks. The oldest Earth rocks tested thus far are about 3
- 13. 1/3 billion years old. But no one knows whether these are the oldest rocks on
- 14. Earth. Tests on rocks from the moon and on meteorites show that these are
- 15. about 4.6 billion years old. Scientists believe that this is the true age of the solar
- 16. system and probably the true age of the Earth.

- 1. According to the text, how do scientists estimate the age of the Earth?
 - a) By measuring the ratios of radioactive elements in rocks
 - b) By examining fossils
 - c) By studying sunspots
 - d) By examining volcanic activity
- 2. Scientists estimate the age of the Earth as
 - a) 3 1/3 billion years old.
 - b) 4 billion years old.
 - c) 4.6 billion years old.
 - d) 6 billion years old.
- 3. According to the text, what are scientists forced to look at to determine the early history of the Earth?
 - a) Human alteration of the Earth
 - b) Erosion and crustal motions
 - c) Solar flares
 - d) Deforestation
- 4. What is the best title for this text?
 - a) "Determining the Age of the Earth"
 - b) "Determining the Age of the Solar System"
 - c) "Erosion and Crustal Motion of Earth"
 - d) "Radioactive Elements in Rocks"
- 5. In line 6, the word **bombardment** means
 - a) an avoidance
 - b) an attack
 - c) an effect
 - d) a cause

- 1. It was previously believed that dinosaurs were cold-blooded creatures, like
- 2. reptiles. However, a recent discovery has led researchers to believe they may
- 3. have been warm-blooded. The fossilized remains of a 66 million-year-old
- 4. dinosaur's heart were discovered and examined by x-ray. The basis for the
- 5. analysis that they were warm-blooded is the number of chambers in the heart as
- 6. well as the existence of a single aorta.
- 7. Most reptiles have three chambers in their hearts, although some do have
- 8. four. But those that have four chambers, such as the crocodile, have two arteries
- 9. to mix the oxygen-heavy blood with oxygen-lean blood. Reptiles are cold-
- 10. blooded, meaning that they are dependent on the environment for body heat. Yet
- 11. the fossilized heart had four chambers in the heart as well as a single aorta. The
- 12. single aorta means that the oxygen-rich blood was completely separated from
- 13. the oxygen-poor blood and sent through the aorta to all parts of the body.
- 14. Mammals, on the other hand, are warm-blooded, meaning that they **generate**
- 15. their own body heat and are thus more tolerant of temperature extremes. Birds
- 16. and mammals, because they are warm-blooded, move more quickly and have
- 17. greater physical endurance than reptiles.
- 18. Scientists believe that the evidence now points to the idea that all dinosaurs
- 19. were actually warm-blooded. Ironically, the particular dinosaur in which the
- 20. discovery was made was a Tescelosaurus, which translates to "marvelous
- 21. *lizard*". A lizard, of course, is a reptile.
- 1. The word they in line 2 refers to
 - a) researchers
 - b) discoveries
 - c) reptiles
 - d) dinosaurs
- 2. According to the author, what theory was previously held and now is being questioned?
 - a) That dinosaurs were warm-blooded
 - b) That dinosaurs had four-chambered hearts
 - c) That dinosaurs were swifter and stronger than reptiles
 - d) That dinosaurs were cold-blooded

3. The author implies that reptiles

- a) have four-chambered hearts.
- b) have one aorta
- c) are cold-blooded
- d) are faster and have more endurance than mammals.

4. The word **generate** in paragraph three is closest in meaning to

- a) produce
- b) lose
- c) use
- d) tolerate

5. The author implies that birds

- a) move faster and have greater endurance than reptiles.
- b) move slower and have less endurance than reptiles.
- c) move faster and have greater endurance than dinosaurs.
- d) move slower and have less endurance than dinosaurs.

Text 20

- 1. Some cities are located by chance. A wagon breaks down, the driver spends
- 2. sometime in repairs, he finds that he is in a **congenial** spot, and settles down.
- 3. Later another person builds a house nearby, and later someone adds an inn.
- 4. Someone else starts selling farm products there. Soon there is a little market,
- 5. which grows to a town, and later to a city. Other places were destined by nature
- 6. to become cities. London, for example, is on what is called the head of
- 7. navigation the point where it becomes too difficult for ocean-going ships
- 8. to continue upriver, and must transfer their cargoes. As with London, the head of
- 9. navigation is also the point where the river can be conveniently bridged. In fact,
- 10. the location of a bridge is often the reason for the birth of a town as Cambridge
- 11. or Waybridge in England show. Again, a good harbour will generally lead to a
- 12. city growing up about it. New York and San Francisco began life as ports, as did
- 13. Cape Town in South Africa.
- 14. Some places were created mainly for military purposes, such as Milan, and the
- 15. host of English cities finishing with cester, which is derived from castra which
- 16. means camp in Latin. Chester itself, created to guard the Welsh border is a very
- 17. good example. Other such military bases are Manchester, Doncaster, and of

- 18. course, Newcastle. A few cities are not created by accident, but by intention.
- 19. This was the case with Milton Keynes in England, but the most famous
- 20. examples of such cities are capitals. Brasilia, Canberra and Washington
- 21. are capitals created in modern times, but even their greatest admirers will admit
- 22. that they lack a certain character. It is no co-incidence that there are famous pop
- 23. songs about New York, ("New York, New York"), Chicago ("My kind of
- 22. Town"), San Francisco (Going to San Francisco") and many other US cities,
- 23. but none about the nation's capital. On the other hand any Londoner can give
- 24. you at least three songs about the place.

1. This text is about

- a) why capital cities are created
- b) places where cities might begin
- c) urban life
- d) why some city sites are chosen

2. London owes its origin to

- a) a river
- b) a bridge
- c) an army camp
- d) countryside ships could sail to

3. The writer feels that

- a) cities are created by chance
- b) planned cities lack soul
- c) no-one can tell why a city will develop
- d) some cities were planned by generals

4. The word **congenial** in line 2 is closest in meaning to

- a) pleasing
- b) noisy
- c) related
- d) favourable

5. Which is **NOT** given as a reason for a new city?

- a) wars
- b) random events
- c) trade
- d) navigation

- 5. town. The plan of the French Quarter was created by the French in the
- 6. eighteenth century. It shows the formal organization that was popular in France

- 13. decorate the houses in the Spanish style of the time.
- 14. Another influence on the architecture of New Orleans came from the West
- 15. Indies. Wealthy planters from the West Indies began opening houses in the

- 1. There has been a lot of **confusion** about Earth's age throughout history.

- 3. age of our planet. Prior to this time, they had thought that Earth was created
- 4. around 4,000 or 5,000 B.C.
- 5. In the middle of the nineteenth century, British physicist Lord Kelvin, the
- 6. person that the Kelvin temperature scale is named after, came up with a very
- 7. different idea about Earth's age. His idea may have been well-reasoned, but it
- 8. was, unfortunately, also incorrect. Lord Kelvin determined Earth's age based
- 9. upon its temperature. Scientists at the time understood that Earth's center was
- 10. very hot, much hotter than Earth's surface. Lord Kelvin determined Earth's age
- 11. by calculating how long it would take the surface to cool down from the
- 12. **scorching** temperatures inside. Based on these calculations, Lord Kelvin

- 13. **calculated** that Earth was approximately 100 mln. years old.
- 14. Lord Kelvin's calculation of Earth's age was better than previous
- 15. calculations, but it was still not an accurate estimate. It was not correct because
- 16. Lord Kelvin did not understand the effect of radioactivity on the cooling of
- 17. Earth's surface. Radioactivity occurs naturally on Earth, and radioactivity
- 18. creates heat. The naturally occurring radioactivity on Earth has caused Earth to
- 19. cool much less swiftly than Lord Kelvin had calculated. In the twentieth
- 20. century, based on an understanding of the effect of radioactivity on the cooling

- 2. sugar, palm sugar, and corn sugar. The two most widely used kinds of sugar are cane
- 3. sugar and beet sugar.
- 4. It is generally believed that sugar cane was first grown in India. Sugarcane is the
- 5. plant that is used to make sugar from cane, or cane sugar. From India, the sugarcane
- 6. plant moved into other parts of Asia as well as North Africa and Europe. Christopher
- 7. Columbus was well **acquainted** with sugarcane because his wife's mother owned a

- 2. trying to help local industry. Instead of helping local industry, however, he caused
- 3. a **major** problem with the local environment.
- 4. The scientist thought that it would be a good idea to try to develop the silk
- 5. making industry in Medford. He knew that the silk industry in Asia was successful
- 6. because of the silkworm, a caterpillar that ate only mulberry leaves. Mulberry trees
- 7. did not grow in Medford, so the scientist decided to work on developing a type of
- 8. silk-making worm that would eat the type of tree leaves in Medford.
- 9. His plan was to create a worm that was a **cross** between the Asian silkworm
- 10. and another type of imported worm that would eat the types of leaves around
- 11. Medford. Unfortunately, his plan did not turn out as he wanted. He was not able to
- 12. **come up with** a silk-producing worm. However, the worms that he imported did

- 4. it was almost nonexistent.
- 5. To increase its naval power, the United States tried to **convert** merchant
- 6. ships into warships. When a merchant ship was converted into a warship, two
- 7. big changes were made. First, the cargo hold was emptied. Then heavy cannons
- 8. to fight the enemy were added to the top of the deck. This type of conversion of
- 9. merchant ships into warships was not always successful, for a very good reason.
- 10. The changes that were made to convert a ship from a merchant ship to a
- 11. warship made the ship much less stable. A heavy cargo in the hold at the bottom
- 12. of a merchant ship allowed the ship to stay balanced in the water. When the
- 13. cargo was removed, the ship became less stable. Then, when the heavy metal
- 14. cannons were added to the deck of the ship, the ship became even less stable. As
- 15. **a result**, a number of these converted merchant ships tipped over and sank.

- 1. Federal Express is a company that specializes in rapid overnight delivery of
- 2. high-priority packages. The first company of its type, Federal Express was
- 3. founded by the youthful Fred Smith in 1971, when he was only 28 years old.
- 4. Smith had actually **developed** the idea for the rapid delivery *Line* service in a
- 5. term paper for an economics class when he was a student at Yale University.
- 6. The term paper reputedly received a less-than-stellar grade because of the
- 7. infeasibility of the project that Smith had outlined. The model that Smith
- 8. proposed had never been tried; it was a model that was efficient to operate but at
- 9. the same time was very difficult to institute.
- 10. Smith achieved efficiency in his model by designing a system that was
- 11. separate from the passenger system and could, therefore, focus on how to
- 12. deliver packages most efficiently. His strategy was to own his own planes so
- 13. that he could create his own schedules and to ship all packages through the **hub**
- 14. city of Memphis, a set-up which resembles the spokes on the wheel of a
- 15. bicycle. With this combination of his own planes and hub set-up, he could get

- 16. packages anywhere in the United States overnight.
- 17. What made Smith's idea difficult to institute was the fact that the entire
- 18. system had to be created before the company could begin operations. He
- 19. needed a fleet of aircraft to collect packages from airports every night and
- 20. deliver them to Memphis, where they were immediately sorted and flown out to
- 21. their new destinations; he needed a fleet of trucks to deliver packages to and
- 22. from the various airports; he needed facilities and trained staff all in place to
- 23. handle the operation. Smith had a \$4 million inheritance from his father, and he
- 24. managed to raise an additional \$91 million dollars from venture capitalists to get
- 25. the company operating.
- 26. When Federal Express began service in 1973 in 25 cities, the company was
- 27. not an immediate success, but success did come within a relatively short period
- 28. of time. The company lost \$29 million in the first 26 months of operations.
- 29. However, the tide was to turn relatively quickly. By late 1976, Federal Express
- 30. was carrying an average of 19,000 packages per night and had made a profit of
- 31. \$3.6 million.

- 1. Benjamin Franklin is famous in the history of the United States because of
- 2. his many and varied accomplishments later in his life, as a brilliant diplomat, as
- 3. a scientist, as an inventor, as a philosopher, and as a public official. Early in his
- 4. life, however, he was **headed for** a career as a printer. He was apprenticed at the
- 5. age of twelve in a print shop that belonged to his half-brother James. Where
- 6. faced with the unhappy prospect of spending nine years in an intolerable
- 7. situation, Benjamin devised a way to get out of his contract as an apprentice
- 8. printer in a rather unusual and creative way.
- 9. Benjamin's half-brother James ran a weekly newspaper, the New-England
- 10. Courant, and it was in this paper that young Benjamin worked as an apprentice
- 11. printer. Unbeknownst to his half-brother James, who owned the paper, a very
- 12. young Benjamin wrote a series of humorous letters to the paper.
- 13. He did not sign his own name to these letters. Instead, he used the pseudonym
- 14. Mrs. Silence Dogood. In these letters he mocked the life around Boston. The
- 15. letters amused the paper's readers, but **they** did not have the same effect on city
- 16. officials.
- 17. As a result of the letters, city officials forbade James to publish his
- 18. newspaper. James then decided to continue printing the paper using Benjamin's
- 19. name rather than his own; in order to do this, however, James had to release
- 20. Benjamin from his contract as an apprentice. After all, a newspaper could not
- 21. be headed by an apprentice printer. After James had released Benjamin from his
- 22. apprenticeship, he was to discover that Benjamin had written the letters that had
- 23. caused so much trouble. He was angry that he had lost the right to publish
- 24. his paper because of Benjamin. On his part, Benjamin was delighted to have
- 25. been released from his contract as an apprentice.
- 26. Later in his life, after he had achieved success in so many varied fields of
- 27. endeavor, Ben Franklin did admit that he had not handled his dissatisfaction
- 28. with his apprenticeship in the most mature way. However, he still appreciated
- 29. the creative way that he had dealt with the problem.

- 1. The main idea of the text is that Benjamin Franklin

Text 10

- 1. The Celtic languages are a group of languages of northern Europe that are
- 2. descendents of the Indo-European family of languages. These languages developed
- 3. from the language of the Celts, a warlike civilization originating in the eastern part
- 4. of central Europe, in the northern Alps, and along the Danube during the Bronze
- 5. Age. The Celts reached the height of their civilization during the Iron Age, the last
- 6. five centuries B.C., and then **fanned out** from their original homeland into many
- 7. parts of continental Europe and across the Channel and into the British Isles, Celtic
- 8. languages were spoken in much of western Europe during Pre-Roman and Roman
- 9. times. Place names of Celtic origin can be found today all over the British Isles

- 10. and France, in northern Spain and Italy, and in Switzerland and parts of Germany.
- 11. Rather than one language, the Celtic languages consist of two distinct clusters:
- 12. the Gaelic group and the Brythonic group. These two clusters of languages most
- 13. likely developed from dialects of the same language, the language of the Celts in
- 14. their original homeland. These two dialects were most likely mutually intelligible
- 15. to some degree as late as the fourth century. The Gaelic group of Celtic languages
- 16. consists of Irish, Scottish, and Manx, the language of the Isle of Man. The
- 17. Brythonic group of Celtic languages includes Welsh, Cornish, Breton, and Gaulish,
- 18. the language of Gaul prior to the days of the Roman Empire, with its Latin-
- 19. speaking population.
- 20. Many, though not all, of the Celtic languages are either extinct or are in the
- 21. process of becoming extinct. Gaulish apparently disappeared around 600 A.D.
- 22. Cornish and Manx both actually became extinct, the former in the nineteenth
- 23. century and the latter just a few decades ago, but both are being revived and are
- 24. now taught in a few schools each. Scottish, Irish, and Breton are all declining in
- 25. use. There are under a hundred thousand speakers of Scottish Gaelic, mostly on the
- 26. northern Hebridean Islands; there are more than a hundred thousand speakers of
- 27. Irish, mainly in the western counties of Ireland; there are about a half million
- 28. speakers who use Breton on a daily basis. In all these situations, though, the rate of
- 29. transmission to new generations is low, and this does not bode well for the survival
- 30. of these languages. Of all the Celtic languages, perhaps only Welsh has a strong
- 31. hold on the future.

1. The author's purpose in the text is to

- a) describe the past and present of a related set of languages.
- b) list the major characteristics of Celtic languages.
- c) outline the major achievements of the Celts.
- d) explain how languages manage to survive without changing.

2. According to the text, the Celtic languages did NOT

- a) develop from the Indo-European language family

- d) provide any Italian place names

- 3. The text states that the Celts were
 - a) peaceful farmers
 - b) unheard of during the Bronze Age
 - c) at their peak during the Iron Age
 - d) at the height of their civilization 1,500 years ago
- 4. The expression **fanned out** in line 6 could best be replaced by
 - a) spread out
 - b) called off
 - c) got lost
 - d) turned out
- 5. It is implied in the text that Gaulish
 - a) first surfaced after the Roman Empire
 - b) has been revived in the last century
 - c) is declining in use
 - d) was replaced by Latin
- 6. The main idea of the third paragraph is that
 - a) all Celtic languages are extinct.

 - d) Lines 12-14

- 1. Perhaps better known than the Cullinan Diamond is the Hope Diamond, a
- 2. valuable and rare blue gem with a background of more than 300 years as a
- 3. world traveler. The 112-carat blue stone that later became the Hope Diamond
- 4. was mined in India some time before the middle of the seventeenth century
- 5. and was first known to be owned by Shah Jahan, who built the TajMahal in
- 6. memory of his beloved wife. From India, the celebrated blue stone has changed
- 7. hands often, moving from location to location in distant corners of the world.
- 8. In the middle of the seventeenth century, a trader from France named Jean
- 9. Baptiste Tavernier acquired the large blue diamond, which was rumored to have
- 10. been illegally removed from a temple. Tavernier returned to France with the big
- 11. blue gem, where the stone was **purchased** by the Sun King, Louis XIV. Louis
- 12. XIV had it cut down from 112 to 67 carats to make its shape symmetrical and to
- 13. maximize its sparkle. The newly cut diamond, still huge by any standards, was
- 14. passed down through the royal family of France, until it arrived in the hands of
- 15. Louis XVI and Marie Antoinette. During the French Revolution, Louis XVI and
- 16. his wife met their fate on the guillotine in 1793, and the big blue diamond
- 17. disappeared from public sight.
- 18. The diamond somehow managed to get from France to England, where
- 19. banker Henry Hope purchased it from a gem dealer early in the
- 20. nineteenth century. The huge blue stone was cut into a 45.5-carat oval,
- 21. and at this point it took on the name by which it is known today. The
- 22. diamond stayed in the Hope family for around a century, when deep
- 23. indebtedness brought on by a serious gambling habit on the part of one

- 24. of Henry Hope's heirs forced the sale of the diamond.
- 25. From England, the Hope Diamond may have made its way into the
- 26. hands of the Sultan of Turkey; whatever route it took to get there, it
- 27. eventually went onto the United States when American Evelyn Walsh
- 28. McLean purchased it in 1911. Mrs. McLean certainly enjoyed showing
- 29. the diamond off. The guests in her home were sometimes astounded to
- 30. notice the huge stone embellishing the neck of Mrs. McLean's Great Dane
- 31. as the huge pet trotted around the grounds of her Washington, D.C.
- 32. home. The Hope Diamond later became the property of jeweler Harry
- 33. Winston, who presented the stunning 45.5-caratpiece
- 34. to the Smithsonian in 1958. The Hope Diamond is now taking a well-
- 35. earned rest following its rigorous travel itinerary and is on display at the
- 36. Smithsonian Institution in Washington. D C. where it has been since
- 37. 1958.
- 1. The main idea of this text is that the Hope Diamond
 - a) came from India

- 1. The locations of stars in the sky relative to one another do not appear to the
- 2. naked eye to change, and as a result stars are often considered to be fixed in
- 3. position. Many unaware stargazers falsely assume that each star has its own
- 4. permanent home in the nighttime sky. In reality, though, stars are always
- 5. moving, but because of the tremendous distances between stars themselves and
- 6. from stars to Earth, the changes are barely **perceptible** here. An example of
- 7. a rather fast-moving star demonstrates why this **misconception** prevails; it
- 8. takes approximately 200 years for a relatively rapid star like Bernard's star to
- 9. move a distance in the skies equal to the diameter of the earth's moon. When the
- 10. apparently **negligible** movement of the stars is contrasted with the movement of
- 11. the planets, the stars are seemingly unmoving.

- d) Although stars move, they seem to be fixed.

10. The text does **NOT** discuss

- a) the movement of the planets
- b) Bernard's star

Line number

- 1. Charles Lutwidge Dodgson is perhaps not a name that is universally
- 2. recognized, but Dodgson did achieve enormous success under the pseudonym
- 3. Lewis Carroll. He created this pseudonym from the Latinization, Carolus
- 4. Ludovicus, of his real given names. It was under the name Lewis Carroll that
- 5. Dodgson published the children's book *Alice's Adventures in Wonderland*
- 6. (1865) and its sequel Through the Looking Glass (1872). Though Dodgson
- 7. achieved this success in children's literature, he was not an author of children's
- 8. books by training or profession. His education and chosen field of pursuit were
- 9. far removed from the field of children's literature and were instead focused on
- 10. theoretical mathematics.
- 11. Dodgson graduated with honours from Christ Church, Oxford, in 1854 and
- 12. then embarked on a career in the world of academia. He worked as a lecturer
- 13. in mathematics at Oxford and, later in his career, published a number of
- 14. theoretical works on mathematics under his own name rather than under the
- 15. pseudonym that he used for his children's stories. He produced a number of
- 16. texts for students, such as A Syllabus of Plane Algebraical Geometry
- 17. (1860), Formulae of Plane Trigonometry (1861), which was **notable** for the
- 18. creativity of the symbols that he used to express trigonometric functions such
- 19. as sine and cosine, and A Guide for the Mathematical Student (1866). In a
- 20. number of more esoteric works, he championed the principles of Euclid; in
- 21. Euclid and His Modern Rivals (1879), he presented his ideas on the superiority
- 22. of Euclid over rival mathematicians in a highly imaginative fashion, by devising
- 23. a courtroom trial of anti-Euclid mathematicians that he named "Euclid-
- 24. wreakers" and ultimately finding the defendants guilty as charged. Curiosa
- 25. Mathematica (1888-1893) made a further defense of Euclid's work, focusing
- 26. on Euclid's definition of parallel lines. These academic works never had the
- 27. universal impact of Dodgson's works for children using the name Lewis Carroll,
- 28. but **they** demonstrate a solid body of well-regarded academic material.

- 1. Esperanto is what is called a planned, or artificial, language. It was
- 2. created more than a century ago by Polish eye doctor Ludwik Lazar
- 3. Zamenhof. Zamenhof believed that a common language would help to
- 4. alleviate some of the misunderstandings among cultures.
- 5. In Zamenhof's first attempt at a universal language, he tried to create a
- 6. language that was as uncomplicated as possible. This first language included
- 7. words such as ab, ac, ba, eb, be, and ce. This did not result in a workable
- 8. language in that these monosyllabic words, though short, were not easy to
- 9. understand or to retain.
- 10. Next, Zamenhof tried a different way of constructing a **simplified**
- 11. language. He made the words in his language sound like words that people
- 12. already knew, but he simplified the grammar tremendously. One example of
- 13. how he simplified the language can be seen in the suffixes: all nouns in this
- 14. language end in o, as in the noun amilia, which means "friend", and all
- 15. adjectives end in -a, as in the adjective bela, which means "pretty". Another

- 16. example of the simplified language can be seen in the prefix mal-, which
- 17. makes a word opposite in meaning; the word *malamiko* therefore means
- 18. "enemy," and the word *malbela* therefore means "ugly" in Zamenhof's
- 19. language.
- 20. In 1887, Zamenhof wrote a description of this language and published
- 21. it. He used a penname, Dr. Esperanto, when signing the book. He selected the
- 22. name Esperanto because this word means "a person who hopes" in his
- 23. language. Esperanto clubs began **popping up** throughout Europe, and by
- 24. 1905 Esperanto had spread from Europe to America and Asia.
- 25. In 1905, the First World Congress of Esperanto took place in France, with
- 26. approximately 700 attendees from 20 different countries. Congresses were
- 27. held annually for nine years, and 4,000 attendees were registered for the
- 28. Tenth World Esperanto Congress scheduled for 1914, when World War I
- 29. erupted and forced its cancellation.
- 30. Esperanto has had its **ups and downs** in the period since World War I.
- 31. Today, years after it was introduced, it is estimated that perhaps a quarter of
- 32. million people are fluent in it.
- 33. Current advocates would like to see its use grow considerably and are
- 34. taking steps to try to make this happen.

Text 15

- 1. The rattlesnake has a reputation as a dangerous and deadly snake with a fierce
- 2. hatred for humanity. Although the rattlesnake is indeed a venomous snake
- 3. capable of killing a human, its nature has perhaps been somewhat exaggerated in
- 4. myth and folklore.
- 5. The rattlesnake is not inherently aggressive and generally strikes only when it
- 6. has been put on the defensive. In its defensive posture the rattlesnake raises the
- 7. front part of its body off the ground and assumes an S-shaped form in preparation
- 8. for lunge forward. At the end of a forward thrust, the rattlesnake pushes its fangs
- 9. into the victim, thereby injecting its venom.
- 10. There are more than 30 species of rattlesnakes, varying in length from 20
- 11. inches to 6 feet. In the United States there are only a few deaths annually from

- 1. A solar eclipse occurs when the Moon moves in front of the Sun and hides at
- 2. least some part of the Sun from the earth. In a partial eclipse, the Moon covers
- 3. part of the Sun; in an annular eclipse, the Moon covers the center of the Sun,
- 4. leaving a bright **ring** of the light around the Moon; in a total eclipse, the Sun is
- 5. completely covered by the Moon.
- 6. It seems rather improbable that a celestial body size of the Moon could
- 7. completely **block out** the tremendously immense Sun, as happens during a total
- 8. eclipse, but this is exactly what happens. Although the Moon is considerably
- 9. smaller in size than the Sun, the Moon is able to cover the Sun because of their
- 10. **relative** distances from Earth. A total eclipse can last up to 7 minutes, during
- 11. which time the Moon's shadow moves across Earth at a rate of about 6
- 12. kilometers per second.

 - a) square
 - b) cover

- 6. According to the text, how can the Moon hide the Sun during a total eclipse?
 - a) The fact that the Moon is closer to Earth than the Sun makes up for the Moon's smaller size.
 - b) The Moon can only obscure the Sun because of the Moon's great distance from the earth.
 - Because the Sun is relatively close to Earth, the Sun can be eclipsed by the Moon.
 - d) The Moon hides the Sun because of the Moon's considerable size.

- 1. What is commonly called pepper in reality comes from two very
- 2. different families of plants. Black and white pepper both come from the fruit
- 3. of the *Piper nigrum*, a vine with fruits called *peppercorns*. The peppercorns
- 4. **turn** from green to red as they ripen and finally blacken as they dry out. The
- 5. dried-out peppercorns are ground to obtain black pepper. White pepper,
- 6. which has a more subtle flavor than black pepper, comes from the same
- 7. peppercorns as black pepper; to obtain white pepper, the outer hull of the
- 8. peppercorn, the pericarp, is removed before the peppercorn is ground.
- 9. Red and green peppers, on the other hand, come from a completely
- 10. different family from black and white pepper. Red and green peppers are
- 11. from the genus Capsicum. Plants of this type generally have tiny white
- 12. flower and fruit which can be any one of a number of colors, shapes, and
- 13. sizes. These peppers range in flavor from very mild and sweet to the most
- 14. incredibly burning taste imaginable.
- 15. Christopher Columbus is responsible for the present-day confusion over
- 16. what a pepper is. The *Piper nigrum* variety of pepper was highly valued for
- 17. centuries, and high demand for pepper by Europeans was a major cause of
- 18. the fifteenth-century **push** to locate ocean routes to the spice-growing
- 19. regions of Asia. When Columbus arrived in the New World in 1492, he was
- 20. particularly interested in finding black pepper because of the high price that
- 21. it would command in Europe. Columbus came across plants from the
- 22. Capsicum family in use among the people of the New World, and he
- 23. incorrectly identified **them** as relatives of black pepper. Columbus
- 24. introduced the spicy *Capsicum* chili peppers to Europeans on his return from
- 25. the 1492 voyage, and traders later spread them to Asia and Africa. These

- 26. Capsicum peppers have continued to be called peppers in spite of the fact
- 27. that they are not related to the black and white pepper of the *Piper nigrum*
- 28. family.
- 1. The purpose of this text is

- 1. The hippopotamus is the third largest land animal, smaller only than the
- 2. elephant and the rhinoceros. **Its** name comes from two Greek words which
- 3. mean "river horse". The long name of this animal is often shortened to the
- 4. easier to handle term "hippo". The hippo has a natural affinity for the water.
- 5. It does not **float** on top of water, instead, it can easily walk along the bottom
- 6. of a body of water. The hippo commonly remains underwater for three to
- 7. five minutes and has been known to stay under for up to half an hour before
- 8. coming up for air.
- 9. In spite of its name, the hippo has relatively little in common with the
- 10. horse and instead has a number of interesting similarities in common with

- 11. the whale. When a hippo comes up after a stay at the bottom of a lake or
- 12. river, it releases air through a blowhole, just like a whale. In addition, the

- 4. it can die from diseases that spread throughout an elephant herd; or it can die
- 5. from drought or from the lack of food that almost certainly accompanies the
- 6. inadequate supply of water.
- 7. If, however, an elephant **survives** these disasters, it falls prey to old age in its
- 8. mid-sixties. Around this age, the cause of death is attributed to the loss of the
- 9. final set of molars. When this last set of teeth is gone, the elephant dies from
- 10. **malnutrition** because it is unable to obtain adequate nourishment. In old age,
- 11. elephants tend to search out a final home where there is shade for comfort from

- 13. have been found in such places.

- 2. no rainfall, but this is hardly true. Many deserts have varied geographical
- 3. formations ranging from soft, rolling hills to stark, jagged cliffs, and most deserts
- 4. have a permanent source of water. Although deserts do not receive a high

- 8. Desert plants have a variety of **mechanisms** for obtaining the water needed for
- 9. survival. Some plants, such as cactus, are able to store large amounts of water in
- 10. their leaves or stems; after a rainfall these plants absorb a large supply of water
- 11. to last until the next rainfall. Other plants, such as **mesquite**, have
- 12. extraordinary deep root systems that allow them to obtain water from far below the

When we are children, our siblings – that is, our brothers and sisters are our first			
friends and first enemies The effect of sibling relationships in			
childhood can last a lifetime. Many experts say that the relationship among brothers			
and sisters explains a great deal about family life, especially today when brothers and			
sisters often spend more time with one another than with their parents.			
Studies have shown that sibling relationships between sister-sister pairs and			
brother-brother pairs are different Brothers are the most			
competitive. Sisters are usually more supportive of each other. They are more			
talkative, frank, and better at expressing themselves and sharing their feelings. On the			
other hand, brothers are usually more competitive with each other.			
For example, studies have shown that both brothers and sisters			
become more competitive and aggressive when their parents treat them even a little bit			
differently from one another Genetics, gender, life events, people,			
and experiences outside the family all shape the lives of siblings. Recently, one			
researcher demonstrated another factor in sibling relationships In			
fact, they respond to arguments by taking sides - supporting one sibling and punishing			
the other.			
1) Sister pairs are the closest.			
2) Experts agree that the relationship among siblings is influenced by many factors.			
3) It was discovered that children dislike watching their siblings fight.			
4) Females and males generally have different relationships.			
5) At the end of life, they are often our oldest friends and oldest enemies.			
6) But parental treatment is not the only factor.			
7) In fact, siblings support their brothers in an argument.

to grow, parents are more likely to consider home-schooling as an option because

dangerous places.

All of you are enrolled in this introductory education course because you want to
become teachers. I'd like to introduce this course with a little information about the
life of a teacher a century ago. I hope you'll understand this information about early
teachers
Early in the twentieth century, the life of a teacher was quite different from what it
is nowThe rules weren't just about how a teacher could conduct
herself in the classroom and on the school grounds. There were also numerous rules
that governed just about everything a teacher did.
Here are some of the rules For example, they were sometimes
told not to wear colorful clothing, not to dye their hair or wear it loose, and not to wear
their skirts above the ankle. Teachers' whereabouts during after-school hours were
also strictly regulated.
There were rules requiring teachers to be home after 8:00 in the
evening, and there were some rules forbidding them to leave town without permission.
Teachers were forbidden to smoke or to drink And if they wanted
to remain teachers, they couldn't get married.

- 1) They were also sometimes forbidden to spend time with men.
- 2) Teachers had to establish strict rules about their pupils' appearance.
- 3) Teachers fought for their rights and won the battle.
- 4) And I think you'll appreciate how much the life of a teacher has changed over the past century.
- 5) There were very strict rules that governed every aspect of the teacher's life.

- 7) Teachers had to follow strict rules about their appearance.

To this day, the history of ice cream remains a mystery I
was a mixture of snow, nectar, fruit pulp and honey. Others proclaim that Marco Polo
a 13th century adventurer, brought ice cream to Europe from the Far East. However
regardless of where it came from, a great amount of ice cream is eaten in America
every day. It is said that the first parlour in America opened in 1776 in New York
City.
The US, New Zealand, Denmark and Australia top the list
Then comes chocolate, strawberry, Neapolitan and chocolate chip.
After eating ice cream people often get a headache which is called 'brain freeze'
But why does it happen in the first place?
When something cold touches this spot, people get the sensation known as ice crean
headache. It often occurs only in hot weather.
If you want to prevent it, you must try to limit the amount of cold ice crean
touching the roof of your mouth.
1) The favourite flavor is classic vanilla.
2) However, many people say that the first ice cream is credited to Nero.
3) Ice cream is dangerous for health and should be forbidden.
4) Which countries like ice cream most?
5) This unpleasant sensation usually lasts only about 30 seconds.
6) Everybody has a nerve center located on the roof of their mouth.

again.
In the spring, the hotelier decided to go to the great cathedral in the city to give
thanks to God for the hotel's recovery and success He was drawn
in particular to one image in a far corner. As he drew closer, he noticed a familian
image It read, "Saint Nicholas". He reached for a candle to place

One day, rumors spread that the king's son was holding something in his hand and
he would give half of his gold to whoever guessed what it was
Because he was the king's son, everybody thought that it would be natural for him to
be holding either gold or some other valuable thing. Thus, people came one after
another
In these lands there was a boy who had no home or family. He would wander,
spending each night in a different place, and the people named him Grasshopper.
Hearing the rumor of the king's son's contest, the boy said to himself, "Grasshopper,
come on, let's try! Either you will die tomorrow of hunger, or today the king's son
will kill you." Inside, he found the king's son and said, "I will tell
you what you have in your hand."
The king's son challenged him, saying, "Come on, peasant! I wish that you would
guess."
The Grasshopper stood in front of the king's son for several minutes weighing his
thoughts thoroughly, yet, he could not guess "Oh Grasshopper,

For a whole week I did not smoke at all. During this time I
suffered terribly but my wife suffered even more My bad temper
and my enormous appetite were sometimes unbearable even for me. My friends kept
on offering me cigarettes and cigars This picture would amaze

Most people are taught at school that Columbus is one of the greatest heroes of western civilization. For a lot of people, he not only discovered America but introduced the arts, law and religion to the primitive tribes of the New World. .Which view is more reliable? In the 15th century, the Portuguese were one of the most powerful nations on earth. By the end of the century, they were sailing further and further into the Atlantic, in search of a new route to India. . It seemed the most sensible thing to do, but the journey was much further than they thought. No European before had deliberately sailed ships away from land, with no certainty of getting back home safely. In 1492 Columbus sailed west with three small ships: the *Nina*, the *Pinta* and the Santa Maria. After three weeks, on October 12, Columbus and his crew arrived at an island in the Bahamas inhabited by the Indians. . Columbus wrote in his Diary: "They brought us parrots and balls of cotton, and many other things." When the gold Columbus found was not enough, he made the natives into slaves. Columbus thought the Indians were gentler and more intelligent than he had expected. _____. During his later voyages to the Caribbean he imposed terrible punishment on the Indians. Five hundred years later, Christopher Columbus remains an enigma. He clearly . Although many people will insist that they aren't superstitious, omens and superstitions actually play a part in all our lives. Commonsense should, by rights, triumph over instinct. But that's not always the case! _____.You will automatically flinch even though you know the glass will protect you. Instinct wins over common sense! Why do people believe in superstitions? Superstitions come in three main forms each one having its own explanation. _____. Love letters should always be written in ink according to some superstitions. To write in pencil is an ill-omen for the courtship. It is not a good omen to propose by mail and if a girl receives two letters from different lovers at the same time, she will marry neither of them. . And only the person conducting the service should pick it up, or the life of the couple may turn out unhappy. _____. Unable to resist this temptation, some girls will try on their dress but leave off a shoe or a glove, out of respect for this old tradition. How did this type of superstition originate? It is likely that people observed certain unfortunate experiences after having performed an action. They will have avoided these for fear of attracting further misfortune on their way. . Walk under a ladder for instance and there's the danger of some paint, tools or a bucket falling on your head!

- 1) Similarly, it is unlucky for a bride to make her own wedding dress or try it on before a full-length mirror.
- 2) Sometimes there was a sensible explanation for avoiding certain actions.
- 3) Suppose for instance, you're looking out of a window and someone kicks a football in your direction.
- 4) The first one implies that certain actions or omens will attract or signify bad luck.
- 5) Many ideas, such as rocking an empty rocking chair, or breaking a mirror, are said to bring bad luck.
- 6) Many people hang guardian angels from their rear-view mirrors to avoid automobile accidents.
- 7) It is said to be an unlucky omen if the wedding ring is dropped during the wedding ceremony.

Albert Einstein is known all over the world as a brilliant theoretical physicist and the founder of the theory of relativity. ______. Some of his ideas made possible the atomic bomb, as well as television and other inventions. He was born in 1879 in a small German town. . Neither his parents nor his schoolteachers thought much of his mental abilities. His uncle often joked; "Not everybody is born to become a professor." In 1895 Albert failed the entrance examination to a technical college in Zurich. . After graduating the college, Einstein started to work at the Swiss Patent Office in Bern. In 1905 he wrote a short article in a science magazine. Later he became a professor in several European Universities and in 1914 moved to Berlin as a member of Prussian Academy of Sciences. After ten years of hard work he created his "General Theory of Relativity." In 1921 Einstein received the Nobel Prize for Physics. A Jew, and the pacifist, he was attacked by the Nazis and when Hitler came to power in 1933 he decided to settle in the United States. In 1939 Albert Einstein wrote a letter to President Roosevelt, at the request of several prominent physicists, outlining the military potential of nuclear energy and the dangers of Nazis lead in this field.
